SUMMARY

AI Engineer and Full Stack Developer specializing in building scalable AI systems, LLM-based applications, and automation workflows. Experienced in developing agent-based architectures, retrieval-augmented systems, and production-grade web applications across multiple domains.

WORK EXPERIENCE

AI Engineer – LYZR AI

Jan 2026 – Present

- Developed AI automation solutions across procurement, customer support, and banking, reducing manual effort by ~80%.
- Built agent-based AI systems for workflow automation, decision-making, and task orchestration.
- Implemented LLM-driven customer support and financial automation pipelines for real-time operations.

Full Stack Developer Intern – DataSpeaks (Remote)

Oct 2024 – Feb 2025

- Built and maintained scalable web applications using the MERN stack (React, Node.js, Express, MongoDB).
- Developed reusable React components and ensured responsive UI/UX design.
- Implemented JWT-based authentication and secure REST APIs.
- Designed MongoDB schemas and handled backend data workflows.
- Collaborated in Agile environments using Git version control.

PROJECTS

Pneumonia Detection Using Deep Learning (ResNet-18)

[GitHub](#) | [Live](#)

- Developed a PyTorch-based CNN model using ResNet-18, trained on 7K+ chest X-ray images, achieving 94% accuracy.
- Applied transfer learning to reduce training time by 35% and decrease false positives by 18%.

Claude MCP Server for E-Mail/Calendar Automation

[GitHub](#) | [Live](#)

- Developed and deployed a Claude MCP Server to automate E-mail and Calendar operations.
- Reduced manual workflow effort by up to 90% through automation and API integration.
- Integrated Anthropic MCP protocol for scalable, context-aware automation.

Voice-Based RAG Assistant

[GitHub](#) | [Live](#)

- Built a voice AI assistant using Whisper, FAISS, GPT-3.5, and gTTS.
- Enabled real-time interaction, reducing manual effort by 85%.

LLM-Powered Document QA Assistant

[GitHub](#)

- Built a document QA system using FastAPI, Hugging Face, and FAISS.
- Improved retrieval efficiency by 90%.

- Developed a real-time MERN chat app with JWT, Socket.IO, and Cloudinary.
- Integrated Gemini API for AI chat, boosting engagement by 70%.

EDUCATION

2022 - 2025

B.Tech in CSE (Data Science), **CMR Technical Campus, Hyderabad**

(GPA: 8.2)

SKILLS

Machine Learning & AI	Python, PyTorch, TensorFlow, Scikit-learn, LLMs, LangChain, FAISS, Hugging Face, RAG, NLP, BERT, Embeddings, Prompt Engineering
Programming	JavaScript, TypeScript, Python, C++, Java, SQL
Full Stack	ReactJS, Node.js, Express.js, MongoDB, Tailwind CSS, FastAPI, Django, REST APIs, JWT, Socket.IO
Tools & Cloud	AWS S3, CI/CD, Data Engineering, Vector Databases
